Disclaimer

2025 is a study designed to comply with a directive from the chief of staff of the Air Force to examine the concepts, capabilities, and technologies the United States will require to remain the dominant air and space force in the future. Presented on 17 June 1996, this report was produced in the Department of Defense school environment of academic freedom and in the interest of advancing concepts related to national defense. The views expressed in this report are those of the authors and do not reflect the official policy or position of the United States Air Force, Department of Defense, or the United States government.

This report contains fictional representations of future situations/scenarios. Any similarities to real people or events, other than those specifically cited, are unintentional and are for purposes of illustration only.

This publication has been reviewed by security and policy review authorities, is unclassified, and is cleared for public release.

Acknowledgments.....	v
Executive Summary	vi
1 Introduction.....	1
2 Required Capability.....	3
Why Would We Want to Mess with the Weather?	3
What Do We Mean by “Weather-modification”?.....	4
3 System Description.....	8
The Global Weather Network.....	8
Applying Weather-modification to Military Operations	10
4 Concept of Operations	13
Precipitation	13
Fog.....	16
Storms.....	18
Exploitation of “NearSpace” for Space Control.....	20
Opportunities Afforded by Space Weather-modification.....	20
Communications Dominance via Ionospheric Modification.....	21
Artificial Weather.....	27
Concept of Operations Summary.....	28
5 Investigation Recommendations	31
How Do We Get There From Here?	31
Conclusions	34
Appendix.....	Page
A Why Is the Ionosphere Important?	36
B Research to Better Understand and Predict Ionospheric Effects.....	39
C Acronyms and Definitions	41
Bibliography.....	42

Acknowledgments

We express our appreciation to Mr Mike McKim of Air War College who provided a wealth of technical expertise and innovative ideas that significantly contributed to our paper. We are also especially grateful for the devoted support of our families during this research project. Their understanding and patience during the demanding research period were crucial to the project's success.
